

Account Number | Account Information

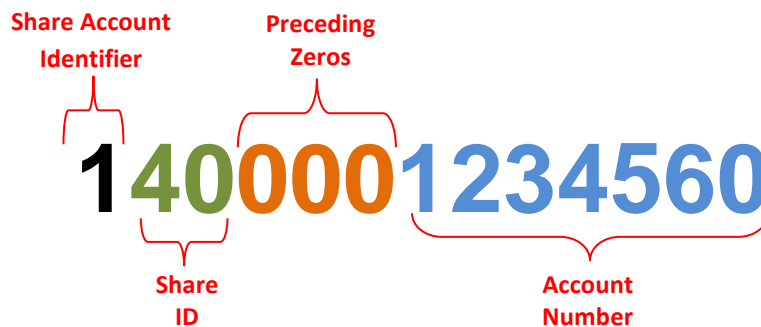

If I need my Account Number to set up Direct Deposit or automatic payments from or to my checking or savings account, where can I find it?

If you have checks, your 13-digit Account Number can be found on the bottom of your checks. You will see a series of numbers separated by colons (:) or other symbols. Your Account Number is the series of numbers (13 digits) in the 'middle' (see below).

Example: 314088572: **1400001234560** : 1234

The full Account Number is very important when providing it to your Payroll Department and/or Vendors for payments. The 13-digit Account Number must be provided to insure proper credit and/or withdrawal.

Account numbers are 13-digits long. Here is an example of a MICR line and a breakdown of its components.

1

Share Account Identifier: The first number designates this as a Share account

- “1”= Share account
- There will never be anything but a “1” as the first number

40

Share I.D.: The next 2 numbers will identify the **Share ID**. (“Account type” such as Checking or Savings)

- A Share ID will always be 2 digits

000

Preceding Zeros: This will be the beginning of the account number which will be as many zeros as needed to make the number a 13 digit number.

- If the **member** number is “123456”, 4 zeros will precede the number to equal the 13 digits to create a full account number.
- Account number “123456”= 140**0000**123456
- Account number 2001247= 140**000**2001247

#

Account Number: The remaining numbers represent the **member** number.

- Current **member** numbers can range from 4 digits to 8 digits.
